1. The Opportunity

NIBE Industrier AB is a Swedish heating, cooling, and energy systems manufacturer, founded in 1952 by Nils Bernerup. HQ in Markaryd, Sweden. Constituent of OMX Nordic 40. Three business segments:

Climate Solutions (~68% of revenue) — heat pumps, water heaters, ventilation. Residential, commercial, industrial.

Element (~25% of revenue) — global leader in heating elements. Counter-cyclical buffer.

Stoves (<10% of revenue) — fireplace heating products.

Market Context

European heat pump market: $22.5B (2025) !' $41.7B by 2032 (CAGR ~9.2%).

Policy tailwind: REPowerEU mandates 60M new heat pumps. EU Heat Pump Action Plan accelerates phase-out of fossil-fuel heating.

2025 growth: Sales grew 11% across 16 European countries, reversing 2024 downturn.

NIBE position: Top-3 European residential heat pumps. 72% of revenue from renewable products.

Key Financials (2025)

Revenue: SEK 40.8B (flat YoY, Q4 recovery)

Op margin target: 14–16%

Geographic split: Europe ~70%, North America ~25%

Employees: ~20,000 globally

Competitor Landscape

Daikin: Global volume leader, expanding Poland/Germany production.

Viessmann: Premium residential, digital push. Key in DACH region.

Bosch: Broad HVAC portfolio, strong OEM channels.

Carrier: Transatlantic scale, commercial strength.

Mitsubishi: Partner since 2009, also competitor in commercial.

Others: Vaillant, Panasonic, Hitachi, Alfa Laval, Danfoss.

2. Core Capabilities

Six core functions designed for specific NIBE user personas.

A. Knowledge Base (RAG)

Retrieval-augmented generation pipeline. Users ask natural-language questions, receive cited answers from authoritative sources.

Sources: **Annual/interim reports (10+ yrs), segment P&L, product specs, myUplink docs, competitor filings, EU regulation DB, acquisition playbooks, patents.**

Output: **Cited answers with confidence scoring and follow-up.**

B. Financial Intelligence

Capabilities: **Quarterly trend extraction, segment P&L (68/25/7%), EBIT tracking vs 14-16% target, geographic analysis, peer comparison, what-if scenarios.**

C. Competitive Intelligence

Monitored: **Daikin, Viessmann, Bosch, Carrier, Mitsubishi — factories, products, M&A, partnerships.**

Delivery: **Weekly Slack digest, on-demand briefs, alerts on significant moves.**

D. Report & Presentation Generation

Formats: **PDF (board reports), PPTX (strategy decks), HTML (dashboards), Slack.**

Templates: **Monthly board reports, strategy memos, sales battle cards, installer training.**

E. Executive Briefing

CEO: **5-min daily — market moves, competitors, regulation.**

CFO: **Financial extracts + margin alerts.**

CCO: **Subsidy changes, competitor pricing, installer sentiment.**

CTO: **Patent alerts, refrigerant tech, efficiency benchmarks.**

F. Production

Slide decks with narrative, data viz, branded formatting. IR materials, product launch decks, trade show content.

3. Extended Use Cases

A. Sales Enablement

- % Proposal generation for developers (efficiency data, ROI, competitor comparison).
- % Real-time subsidy database: "What subsidies in France right now?"
- % Building permit analysis: 50 multi-family permits ranked by heat pump fit.
- % Battle cards: "3 counter-arguments when prospect mentions Viessmann."

B. Marketing

- % Thought leadership articles (REPowerEU angle).
- % Share of voice analysis vs Daikin in German trade press.
- % Case study templates from WaterFurnace installations.

C. Aftermarket & Service

- % myUplink telemetry analysis — predict maintenance needs.
- % Warranty claims by product line, region, installer. Root cause patterns.
- % "Which regions have highest callout rate for S2125?"

D. M&A Screening

- % Screen targets: rev SEK 200M-1B, double-digit margins, no NIBE presence.
- % Monitor Selmo acquisition integration KPIs.
- % Patent mapping for natural refrigerants and modular heat pumps.

E. Regulatory Early Warning

- % F-Gas phase-down schedule !’ model impact on product line refrigerant supply.
- % EPBD alerts: "3 articles affect commercial pipeline — summary below."
- % Country-level subsidy tracker: France, Germany, UK, Poland, Sweden.

4. Technical Architecture

Three-layer architecture: modular, scalable, fresh data.

LAYER 1: DATA — RAG pipeline (vector DB: ChromaDB / Pinecone)
LAYER 2: AGENT CORE — Orchestrator (Hermes LLM)
LAYER 3: TOOLS & OUTPUTS — Report gen | Data viz | Web search | Connectors

Data Freshness

Reports: Auto-ingest on publication.
Competitor news: Daily web scrape + RSS, summarized and indexed.
Regulations: Weekly EU/national policy database check.
myUplink: Real-time API (read-only).

Security

Auth: NIBE SSO / Azure AD. Role-based access.
Isolation: Tenant-level. No cross-customer leakage.
Audit: All queries logged with user, timestamp.
Compliance: GDPR. Configurable retention policies.

5. Execution Plan — MVP

Scope: read-only Q&A on public NIBE data. 3 weeks. Assumes clean data access Day 1.

Week 1-2: Foundation

Gather data (3 yrs reports, top-5 competitor filings, EU summaries). Set up vector DB. Build ingestion pipeline. Index all docs.

Week 2-3: Agent Setup

Deploy LLM backend. Build query!’retrieval!’answer pipeline. Slack bot connector. Test 20 NIBE questions. Iterate on citation quality.

MVP Deliverables

- % Working Slack bot answering NIBE questions with source citations.
- % Confidence scoring (answers below threshold trigger fallback).
- % Usage dashboard (queries/day, satisfaction rate).

Exclusions

% No report gen (PDF/PPTX), no data viz, no myUplink, no news ingestion, no role briefings, no permissions beyond basic auth.

Success Criteria

Week 3: a NIBE sales rep and product manager can query and get cited answers in <5 seconds. 80%+ satisfaction on 50-test set.

6. Execution Plan — Full Product

Month 1: Data & Infra

After MVP validation. 3 months total including MVP phase.

Month 2: Tooling

Complete data ingestion (10 yrs reports, patents, competitor library, subsidy DB). Production RAG pipeline with auto-refresh. SSO integration. Tenant isolation + audit.

Month 3: Pilot

Report engine (PDF, PPTX). Data viz (charts, heatmaps). Slack, Teams, Dynamics connectors. Competitor news scraper. myUplink API integration.

Pilot with one dept (Sales/Strategy), 20 users, 2-week sprint. Feedback + iteration. Admin training. Go/no-go for enterprise rollout.

Full Product Deliverables

- % Board reports, strategy decks, investor materials — PDF/PPTX export.
- % Data viz: segment trends, competitor benchmarks, reg heatmaps.
- % Executive briefings: role-specific daily summaries.
- % Competitor monitoring: weekly digest with rankings and analysis.
- % myUplink predictive alerts.
- % M&A screening: automated target identification.
- % Regulatory early warning: EPBD, F-Gas, subsidy changes.
- % Admin dashboard: analytics, satisfaction, data freshness.

Month 4: **Handover. Production SLA. NIBE admin trained.**
One dept (20 users). Basic RAG. Email support.
Annual commit: **10-15% discount on monthly retainer.**

MVP Pricing Model

SEK/month retainer + usage. Three tiers.

"NIBE already leads in hardware. This agent makes your information advantage match your product advantage."

THE PITCH

8. Sales Pitch

The Problem

- % A sales rep in Poland spends 2 hours searching for efficiency data to counter a Daikin proposal.
- % CFO wants F-Gas impact on refrigerant costs — 3 days to assemble.
- % Strategy needs a competitive landscape update before a board meeting.
- % German installer can't find latest subsidy rates — recommends competitor.

The Solution

One Slack bot. Any question, any time. Cited answers. Reports in seconds. Proactive alerts. Role-specific briefings saving 5-10 hours/week per executive.

The ROI

Executive time: **10 hrs/week recovered (~1.3M SEK/yr per exec).**
Sales cycles: **2 days !’ 5 min for proposal data.**
Analyst replacement: **Team of 3 replaced by one agent.**
Regulatory risk: **Early warnings prevent compliance gaps.**
M&A: **Target screening: weeks !’ minutes.**

9. Next Steps

From pitch to production.

1

VALIDATE

Present to NIBE CFO or Head of Strategy. Confirm pain points, budget, timeline.

2

SCOPE

Pick 2-3 use cases. Recommended: Financial Intelligence + Sales Enablement.

3

PILOT

Deploy MVP to one department. 3 weeks. Measure time saved. Iterate.

4

EXPAND

8-week sign-off !’ full product rollout. Enterprise tenant. SLA live.

5

RETAIN

Weekly knowledge refresh. Quarterly roadmap. Agent becomes as indispensable as ERP.
